

Turnkey I/M Solution

Applus offers an I/M solution to jurisdictions that want the simplest “out-of-the-box” package for a cost effective contractor-managed vehicle emissions testing program.

Applus Technologies, Inc.—part of an international company, Applus Servicios Tecnológicos, with more than \$1 billion in annual revenue—provides vehicle emissions inspection and maintenance (I/M) expertise, services and products across the U.S. and in more than 55 countries. Applus I/M solutions range from comprehensive emissions testing programs—including design, engineering, development, implementation and ongoing program management—to providing component software, hardware and/or testing equipment. Applus has delivered a number of I/M programs, including those in the U.S. states of Connecticut, Georgia, Illinois, Massachusetts, Rhode Island, Utah and Washington and in the Republic of Ireland, Sweden and Denmark.

Turnkey I/M Solution: The Applus Turnkey I/M Solution (TIMS) is a cost effective and, yet, comprehensive “out-of-the-box” package that simplifies the process for city, county and/or state jurisdictions implementing a new or enhanced I/M program. Applus also provides technical and regulatory guidance to ensure government clients have an I/M program that is aligned with their U.S. Environmental Protection Agency (EPA) approved State Implementation Plan (SIP).

TIMS is a cost effective, fully-integrated “no-frills” system that utilizes the most advanced technology for the next generation of I/M programs. Notably, TIMS complies with EPA requirements for an OBDII inspection program, and comes in two configurations. The first is for jurisdictions wishing to implement a basic inspection program using PCs in a garage testing environment. The second configuration is for a wireless inspection program with no fixed stations for testing.

Turnkey I/M Solution

Specifications

TIMS Components for a fixed-station I/M program

- Initial evaluation and SIP attainment studies
- Applus engineered Vehicle Information Database
- Applus Dashboard® with standard reporting package
- Laser printer for Vehicle Inspection Reports
- Free network and analyzer support for first year
- Analyzer and database software modifications for state specific requirements
- EPA reports package
- Dell PC with on-site warranty
- PC based Vehicle inspection OBDII unit

TIMS Components for a wireless I/M program

- Initial evaluation and SIP attainment studies
- Applus engineered Vehicle Information Database
- Applus Dashboard® with standard reporting package
- Laser printer for Vehicle Inspection Reports
- Analyzer and database software modifications for state specific requirements

- EPA reports package
- In-vehicle wireless OBDII unit (One unit required for each vehicle)
- Wireless collection station (One unit required for each base location equipped with a PC and internet connection)

TIMS Enhanced Options

- Biometric devices
- Complete network setup
- Multiple OBDII wireless configurations Analyzer workstations
- Upgraded workstation monitors
- Gas analyzers
- Registration renewal systems
- Diesel testing capabilities
- Gas cap tester kits
- Bar Code scanners
- Kiosks
- Upgraded Dashboard® reporting packages
- Additional consulting and support
- Maintenance packages
- ASM and TSI packages
